Important Update: Tariff Surcharges on Orders and Invoices

Dear Valued Customer,

We wanted to share an update from Honeywell Process Measurement & Controls on goods imported from certain countries into the U.S.

At Honeywell Process Measurement & Controls, we are dedicated to minimizing the impact of tariffs on our customers. Our proactive measures include accelerating USMCA qualification for imports from Mexico and Canada and evaluating alternative supply chain solutions for key products. Despite these efforts, Honeywell's global supply chain and manufacturing network remain affected. To offset these impacts and continue providing value to our customers, we are implementing updated tariff surcharges.

Effective August 11th, revised tariff surcharges will be applied to the following product lines:

- Fixed Gas & Flame Detection – 16%
- Portable Gas Detection – 13%
- High Tech Gas Detection – 13%
- Gas Measurement – 12%
- Terminals – 13%
- Modular Systems – 11%
- Field Instruments – 13%
- Process Instruments – 13%

The revised tariff surcharges will be applied to all SKUs within the respective product lines, on orders placed effective August 11th as well as any prices already quoted for which orders have not been received. The value of the surcharge will be provided with your order confirmations to maintain the transparency expected by our customers throughout this process. To avoid any disruptions to order processing, please include the tariff surcharges on new purchase orders and payments toward invoices.

We have implemented tariff surcharges instead of increasing list prices to provide flexibility. This approach allows us to adjust surcharges as we mitigate duty costs or adapt to U.S. policy changes.

We are monitoring this situation and will keep you informed. We remain steadfast in our commitment to serving our customers. If you have immediate questions, please contact your account manager or customer service team.

Your understanding during this time is greatly appreciated.

Thank you,

Mary Hollingsworth

General Manager, Americas
